# KENTUCKY'S UNIFORM CRIME REPORTING SYSTEM

Prior to July 1, 1987, Kentucky's Uniform Crime Reporting System was based on monthly summary counts of criminal offense and arrests. This data submitted by state and local law enforcement agencies was adequate for broad analysis of general crime trends, however it did not provide necessary tools for detailed studies required to meet the needs of criminal justice professionals, the law enforcement community and Kentucky legislators.

After July 1, 1987, law enforcement agencies were required to submit "Incident" information which differed from "Summary" in that it provided full detail crime specifics. This marked the beginning of Kentucky's Incident Based Reporting System which required the submission of either the Uniform Offense Report (UOR1) or the uniform data elements as contained in the statewide database. While not complete, Kentucky continues to make progress toward full implementation of a complete Incident Based Reporting System.

## **1996:**

The compilation of the 1996 crime data has proven to be a most challenging task for Kentucky State Police due to extensive automated data collection problems. Our computer system experienced a strong power surge during a severe storm which rendered it virtually useless. Repair was not an option and replacement parts were non-existent due to the age of the unit. We are confident that offense information received from the various law enforcement agencies throughout Kentucky is of much better quality than in the past, however we cannot rule out the possibility of having incomplete data as a result of weather related automated system damage.

In an effort to lend support to our crime data retrieval dilemma, the Administrative Office of the Courts (AOC), has provided arrest data for the 1996 Crime in Kentucky publication. Because of differing methods of compilation of this data, you may notice a wide variance between the arrest data provided in the 1995 Crime in Kentucky (which was taken from counts of individuals arrested on copies of the actual citation) and the 1996 arrest data provided by AOC. More in-depth explanation of possible reasons for these variances are listed on page 47 of this publication (State Arrest Data) along with suggested measures to make comparisons with 1995 data.

Currently Kentucky reports summary statistics in **Crime in Kentucky** and to the Federal Bureau of Investigation. A majority of the law enforcement agencies are submitting incident or offense based information. However, some agencies are still submitting summary information due to varying factors. With the approach of the year 2000, our goal is to become NIBRS compliant in that all data elements required by the FBI for NIBRS certification are captured. It is our intention, if budgetary constraints allow, to purchase a new computer system and software which would make this possible while, at the same time, update the offense and arrest reports to likewise capture all required elements.

<b>TOTAL</b>	<b>130,892</b>	<b>127,621</b>	<b>2.6%</b>	<b>100%</b>

The total number of Part I crimes reported by law enforcement agencies in Kentucky during 1996 and 1995 is shown in the chart above. It should be noted that these overall statistics reflect only offenses reported to or known by the police.

There were 130,892 offenses reported in 1996, an increase of 2.6% over 1995. The largest percentage increase was in robbery, with an additional 334 offenses reported during 1996 - an increase of 8.5%. The next largest percentage of increase in Part I offenses was auto theft, with 6.2%.

The only percentage of decrease for 1996 was in the murder category. Although the numbers of murder offenses have increased in specific geographical areas of the State, the overall data reflects a decrease of 44 offenses, or 16.2% less than in 1995. This can also be partly attributed to improved quality control procedures implemented by the Records Section of Kentucky State Police. Murder reports were manually screened to remove acts of "attempted murder" rather than the actual offense of murder. It should also be noted that the category of aggravated assault (a Part I crime) does not include "Assault 4<sup>th</sup> Offenses" (no serious or aggravated injury). These charges were reclassified into the Part II category as "simple assaults" beginning in 1995 and will continue to be counted in this manner for accuracy and continuity in reporting.

When making comparisons between years, the following should be taken into account: 1) Part I offenses are not inclusive of all offenses reported to the police; 2) Increases or decreases in the number of crimes reported can be attributed to a variety of factors, including methods of reporting and tabulating on the part of the law enforcement agencies; 3) Differing levels of citizens' awareness and their responsibility to report crime have a direct impact on the number of reports received by police.

### KENTUCKY "CRIME INDEX" - 3,373.5

The crime index, or rate, is used nationally and is derived from the following formula:  
 Population divided by 100,000 = X  
 Number of offenses divided by X = crime index.  
 Kentucky's crime index for 1996 is based on the current estimated population of 3.88 million.

## CLEARANCE RATES

Clearance rates are the percentages of cases cleared (through arrest or exceptional means) when compared with the total number of offenses reported to or known by the police. As shown in the chart below, clearance rates for property crimes are traditionally low. With the exception of robbery, clearance rates for violent crimes are high. High clearance rates for murder, rape, and aggravated assault are attributable to the fact that the perpetrator is usually known, recognizable, or in some way associated with the victim. Low clearance rates for robbery as well as property crimes can be attributed to the difficulty of the victim in identifying the perpetrator.

The right-hand chart depicts  
the clearance rates of property crimes  
versus violent Part I crimes.

The chart below depicts clearance  
rates for each of the seven Part I crimes.

# MURDER

## DEFINITION

Murder is the unlawful killing of a human being with malice aforethought. Justifiable homicides and traffic-related deaths are not included.

NUMBER REPORTED	CLEARANCES	RATE
227	147	64.8%

Murder is the most serious of all Part I crimes. The clearance rate is the highest of all Part I crimes, at 64.8%. Although some murders are difficult to solve, the intensity of police investigations, together with solvability factors, account for the high clearance rate for murder.

### MURDER: VICTIMS VS. OFFENDERS

The chart on the right shows the sex of murder victims vs. the sex of the offenders and the race of murder victims vs. the race of the offenders. The offender unknown category reflects murders not cleared by arrest and instances where the offender information was not reported. In cases with multiple victims, the offender information is counted for each victim. In some instances, more than one person is charged with the murder of a single victim. Only one offender is shown for each victim in these charts for purposes of continuity.

# RAPE

## DEFINITION

Rape is defined as the carnal knowledge of a person, forcibly or otherwise, against the person's will. Only forcible rapes are included, together with assaults for the purpose of rape and attempted forcible rapes. Excluded are rapes where the victim is under the age of consent and no force is used.

NUMBER REPORTED	CLEARANCES	RATE
1,307	709	54.2%

The 54.2% clearance rate for rape is high when compared with property crimes. One explanation for the number of rapes cleared is the fact that the victim and the offender are frequently acquainted or even related.

**RAPE  
WAS COMMITTED EVERY  
6 HOURS, 42 MINUTES**

## NUMBER OF RAPES BY MONTH

## ROBBERY

### DEFINITION

Robbery is the felonious taking of the property of another by force, the threat of force, violence, and/or by putting the victim in fear. All attempted robberies are included. Robberies are reported in two general categories: armed (any weapon or threatening object is used) and strong-arm (to include muggings and similar offenses where no weapon is used but strong-arm tactics are employed).

NUMBER REPORTED	CLEARANCES	RATE
4,271	1,240	29.0%

Robbery is considered to be a serious crime because the element of fear and personal confrontation with a weapon or strong-arm tactic is always present. The 29.0% clearance rate for robbery is slightly higher than for other crimes motivated by the theft of property, but low in comparison to murder, assault, and rape in which the element of personal confrontation is also present. This is attributable to the fact that the perpetrator usually conceals his personal identity from the victim.

Reported robberies increased by 8.5% in Kentucky in 1996.

**ROBBERY WAS COMMITTED

<b>TOTAL</b>	<b>4,271</b>	<b>100 %</b>	<b>2,525,774.84</b>	<b>\$591.38</b>

Robbery classifications denote the type of robbery reported. Highway robberies occur on any roadway, whether it be a highway, county road, or city street. Commercial house robberies are those perpetrated in hotels, motels, restaurants, and like businesses. Chain store robberies include convenience type stores, groceries, and like businesses. Residences include homes and apartments and other dwellings.

## AGGRAVATED ASSAULT

### DEFINITION

Assault is the unlawful attack by one person upon another for purpose of inflicting severe or aggravated bodily injury. It is not necessary that injury result from an aggravated assault when a gun, knife, or other weapon is used which could, and probably would, result in serious personal injury. Therefore, all assault attempts where serious injury would have been likely to occur are included. Excluded from the Part I crime of aggravated assault are all assaults which do not include the use of a dangerous weapon and in which there was no serious or aggravated injury (assault 4<sup>th</sup>). These simple assaults are counted as Part II crimes.

NUMBER REPORTED	CLEARANCES	RATE
8,589	5,220	60.8%

The 60.8% clearance rate is high because the victim is frequently related to or acquainted with the assailant.

**AGGRAVATED ASSAULT WAS COMMITTED

The category of aggravated assault includes the following offenses: attempts to murder, poisoning, assault with a dangerous or deadly weapon; maiming; assault with explosives; and all attempts to commit said offenses.

# BURGLARY

## DEFINITION

Burglary is the unlawful entering or remaining in a building with the intent to commit a crime. This includes entries where force of any kind is used to gain entrance, entries where no force was used (an unlocked door or by concealment), and attempts to enter forcibly (even though entry was not actually gained).

NUMBER REPORTED	CLEARANCES	RATE
29,306	4,683	16.0%

Burglary is one of the most frequently committed Part I crimes.

Burglary increased 3.8% from 28,226 in 1995, to 29,306 in 1996.

**BURGLARY WAS  
COMMITTED EVERY

## THE COST OF BURGLARY

Burglary is a crime of opportunity and is most likely to occur when a home or business is not occupied. The number of burglaries, classified by residential and non-residential, including both day and night occurrences, and the value of property losses reported, is shown in the table below.

CLASSIFICATION	NUMBER OF OFFENSES	PERCENT OF DISTRIBUTION	TOTAL VALUE	AVERAGE VALUE

## LARCENY

### DEFINITION

Larceny, or larceny-theft, is the unlawful taking of property or articles of value without the use of force, violence, or fraudulent conversion. Included are such offenses as pocket picking, purse snatching (where little or no force is used), shoplifting, thefts from autos, thefts of auto parts and accessories, bicycle thefts, and thefts from buildings when the perpetrator entered legally. Con games, forgeries and bad checks, embezzlement, and obtaining money under false pretenses are not included under the category of larceny.

NUMBER REPORTED	CLEARANCES	RATE
76,751	16,654	21.7%

Larceny is the most frequently committed Part I crime. Other than the stolen property itself, there are normally few clues on which to base an investigation. Consequently, the clearance rate for larceny is low at 21.7% in 1996.

**LARCENY WAS COMMITTED EVERY  
6 MINUTES, 51 SECONDS.**

### THE COST OF LARCENY

The table below shows the different types of larcenies reported in Kentucky during 1996 by classifications. The number of offenses in each classification as well as the value of the stolen property is shown below.

The estimated value of property reported stolen and recovered in Kentucky during 1996 is illustrated by the graph below. (Graph only shows stolen and recovered value ratios for each category. Categories should not be compared to each other.)

## AUTO THEFT

### DEFINITION

Auto Theft includes all thefts and attempted thefts of motor vehicles. The taking of a vehicle for temporary use when prior authority has been granted would not be classified as auto theft.

NUMBER REPORTED	CLEARANCES	RATE

Of the 10,441 vehicles stolen, 84.1% were recovered. These figures do not include vehicles stolen out of state and recovered in Kentucky.

A breakdown, by type of vehicles stolen, is shown in the chart below. Cars include automobiles, taxi cabs, and other passenger vehicles. Other vehicles stolen include mopeds, motorcycles, motor scooters, trailbikes, etc.

## ARSON

### DEFINITION

Arson includes any willful or malicious burning or attempt to burn (with or without intent to defraud) a residence, public building, motor vehicle or aircraft, personal property of another, etc. Only fires determined to have been willfully or maliciously set are classified as arson.
